

ICHI Series Single Stage Ferrite Circulator / Isolator 89-90 MHz

JAG-IC-89-1-XX

AG-IC-132-1-60 Shown with a 60W load

JAG-IC-132-1-30 Shown with a 30W load

JAG isolators and circulators offer superior performance in a compact rugged package. Careful temperature compensation and top quality components ensure high isolation with very low insertion loss over their full operating temperature range, and offer a high degree of RF and magnetic stability. Circulators are supplied without loads. Isolators come equipped with a variety of load terminations. JAG isolators and circulators are available factory-tuned in the 70, 150, 450 and 800-960 MHz frequency bands. Field tunable isolators are available for the 138-174 and 406-430 or 450-470 MHz bands.

Electrical Specific	Mechanical Specifications				Environmental					
Model JAG-IC-89-1-XX	Model JAG-IC-89-1-XX			Model	JAG-IC	-89-1-XX				
Frequency Range (MHz)	89-90	*Note 1	Height	inches (m	ım)	3 (76.2)	Temperat	ure Range	-40-degC to +60-degC	
Bandwidth @ 1.3:1 VSWR or Bett	er (MHz)	2	Width	inches (m	ım)	3 (76.2)	Notes:			
Maximum Input VSWR	1.3:1		Depth inches (mi		ım)	1.4 (35)	1.	Specify model number and exact frequency when ordering		
Maximum Input Power (Watts)	125	*Note 2	Weight	lb (kg)	2.2 (1.0)	*No load	ci	circulator	ower rating for isolators and rculators is determined by load size	
Maximum Insertion Loss (dB)	0.7		Mounting	Mounting Systems		19-inch rack mount	3.	with a maximum going up to 125W Typically 25-30dB of reverse isolation		
Typical Insertion Loss (dB)	0.4				Cavity Plate	4. Ri as • 0	may be observed Replace the X in the model number			
Isolation (dB)	22	*Note 3			Cabinet Customized			follows: = Circulator (no loads)		
Nominal Impedance (Ω)	50		Termination		'N' Female		 15 = 15W load 30 = 30W load 			
Output Load Size (Watts)	15 30 60 125	*Note 4 *Note 4 *Note 4 *Note 4					Example: load)	 60 = 60W load 125 = 125W load Example: JAG-IC-89-1-60 (comes wi load)
