DeltaO Series

EXPOSED FOLDED 800 MHz 900 MHz

JAG-915-2-EX

Electromagnetics "Quality is everything."

Features

- 2-year factory warranty (See page 3)
- Broadband (26 MHz)
- Suitable for multi-frequency systems
- Soldered internal joints
- Small for easy transport and installation
- Field adjustable pattern and gain
- DC Grounded
- Stainless steel hardware
- Easy storage
- Operation in harsh environments
- Optional mast pipe can be supplied*
- Natural rubber plugs
- Side or tower top mountable
- Optional coatings such as black paint
- Ideal for mobile command vehicles
- Ideal for rented or temporary repeaters

Shippable

Description

The JAG-915-2-EX is a 2-bay version of the JAG-915-1-EX. Its unique high efficiency wide bandwidth design allows it to cover the entire 902-928 MHz frequency span with a VSWR of 1.5:1 or better. Because of its bandwidth and very low intermodulation response, the JAG-915-2-EX is useful in a wide range of functions ranging from spread spectrum, Wi-Fi, government and even amateur radio plus endless other applications.

The JAG-915-2-EX as well as the rest of the multi-bay arrays that are based on it feature 6061-T6 aluminum and stainless steel construction. Features such as high quality coax, soldered and welded joints as well as minimized dissimilar metal contacts ensure trouble free

This series (Delta0) is based on an external harness design, which allows easy field adjustment of gain and radiation pattern. The external harness design also offers flexibility in mounting scenarios from tower legs to various pipe sizes. The absence of bulky masts, make Delta0 series easy to transport, install, and ship. Shipping costs are much cheaper for Delta0 series antennas.

Rugged construction, lightweight, and ease of installation, make the JAG-915-2-EX ideal for leased or rented system use. Its bandwidth also makes it perfect to stock for re-use or re-sale.

JAG-915-2-EX at a glance

Note: Only one of the dipoles out of the 2 bays is shown here for illustration purposes Gain values below represent complete antenna (not a single dipole)

1/4 - wave spacing (3.5 - 4.2 dBd gain)(Offset pattern)

½ - wave spacing (3 - 3.7 dBd gain)(Bi-directional / Elliptical pattern)

Heavy-duty galvanized clamp w/S.S. hardware

Natural rubber plugs

*Site-specific mounting masts and clamps are recommended for Delta0 Series antennas. Please consult JAG to determine suitable accessories for your application

WARRANTY

JAG Electronmagnetics warrants all its products against defects in material or workmanship and is only applicable if failure results from these factors within two years from the purchase date by the user. Jag Electromagnetics will be responsible for the supply, at no charge, of new or rebuilt replacements in exchange for defective parts for the duration of the warranty. This warranty does not extend to any JAG products that have been subject to misuse, neglect, accident, improper installation or application. In addition, this warranty does not extend to products that have been repaired or substantially altered outside our manufacturing plant.

JAG Electromagnetics will not be liable for any incidental or consequential damages due to failure of a JAG product under this warranty or any implied warranty. JAG is in no event liable for consequential damages or other costs of any kind as a result of the use of the products manufactured by JAG. No envoy is sanctioned to presume for JAG any other legal responsibility in connection with JAG products. JAG Electromagnetics is not accountable for replacement of any product damaged by lightning.
